Agile Project Management

32 Hours

In-Class

Center of **Excellence** and **Knowledge Hub**

www.ebi.gov.eg

Course Description:

Project management is gaining a lot of attention in modern management science and techniques to properly plan, execute, and control the current running business. Project management methodologies developed over time with the rising need for fast delivery of project components with customer requirements at the center of attention.

Agile methodology came at the heart of such methodological development. Started in the software development industries and became widely known and used in almost every industry on the globe. Awareness and mastering the agile project management methodology and techniques is now an essential skill for those who are managing, participating, or simply part of any ongoing project or initiative.
