

601-P25-CE

In-Class

24 hours

Course Description:

The course provides a broad overview of new Product Design and Development in a Banking context. It is built on the key concepts of customer value proposition, product life cycle, communicating value proposition through product features, and integrating credit risk aspects and pricing considerations in product design. It also covers the importance of building an emotional connection with the customer, and how product design can help build relationships over a customer life cycle. The focus would be to understand the thinking of Product managers that goes behind such developments. Case Studies and Group activities will be spread out throughout the course.

Target Audience:

- Bankers with Experience 2-3 years in the Banking Sector
- Product designers in Bank

Course Objectives:

After completing this course, the participants will be able to:

- Identify banking products features and how it can contribute to a viable product design.
- Communicate Customer Value Proposition (CVP) effectively to customers given that the CVP is fully clear as a concept.
- Prepare a product portfolio strategy for the bank using Product Life Cycle Model (PLC) and BCG Matrix.
- Distinguish credit risk and risk-based customer segments.
- Apply cases on banking products using product profitability and pricing strategies.
