Participants who are already involved or desire to be involved in the credit process will be able to apply lending techniques for effective credit decisions like financial statement analysis, spreading, and cashflow projection.

Target Audience:

To whom this course is designed for (Junior / Intermediate level): All Banking & Non-Banking Institutes aiming to enhance their credit knowledge and upgrade their financial assessment skills.

- Retail Professionals.
- Relationship Officers / Managers.
- Branch Managers.
- Operation Managers.
- Audit & Compliance Professionals.
- Risk Professionals.
- Treasury Professionals.

About the Certificate

The Comprehensive Credit Certificate is a bespoke Certificate designed to provide bankers with a deep understanding of credit and lending fundamentals through comprehensive analysis of financial statements and industry dynamics. The certificate will equip participants with the necessary knowledge to address their clients' needs by designing efficient credit limits. It covers a range of topics, including the basics of accounting, an introduction to economics and industry analysis, financial statement analysis, cash flow analysis, and more.

This certificate aims to provide a clear and broad understanding of major lending techniques and rationales, as well as the types and classification of different credit facilities, enabling sound credit decisions based on acquired knowledge. The Comprehensive Credit Certificate aims to provide practical tools and strategies that enhance credit decision-making to benefit both financial institutions and their corporate clients.

By the end of the certificate, participants will be equipped with the knowledge and skills they need to identify and evaluate the performance of their corporate customers, and to reach accurate judgment on the merits of their corporate clients.

Why Join?

Comprehend
