

CENTRAL BANK OF EGYPT
Egyptian Banking Institute

Banking Operations Framework

Banking Operations and Forgery

10554

E-Learning

45 minutes

Course Description:

This course is designed for entry-level banking professionals, junior compliance officers, and individuals seeking to deepen their understanding of banking systems and operations. By the end of the course, participants will be able to explain the structure and functions of central banks, including the Central Bank of Egypt, and apply their knowledge of core banking operations such as account types, foreign exchange, commercial papers, and SWIFT messaging. They will also be able to be aware of retail banking products and credit management practices. Through scenario-based questions, case studies, and practical exercises, participants will develop and demonstrate a comprehensive understanding of key banking concepts.

Target Audience:

- New bank employees in retail banking, operations, or credit management roles.
- New hires or junior staff seeking foundational knowledge of banking systems.

Course Objectives:

- Explain the structure and role of the banking system, including central banks and their impact on the economy.
- Describe core banking services, including accounts, cash transactions, foreign exchange, and payment systems.
- Explain other banking functions, including credit assessment, treasury, and support functions.
- Identify the main retail banking products and services and their basic purposes.
