Course Description:

GP's LeadershipAI program is a learning journey focused on the evolving role of leaders in today's AI environment. With a strong emphasis on human connection alongside AI integration. It is designed to build leadership skills for a rapidly changing, AI-enhanced context.

Target Audience:

Leaders with existing foundational leadership skills

Course Objectives:

- Prepare leaders to manage human and technology teams in a changing workplace.
- Understand AI's impact on leadership
- Promote AI acceptance within their teams
- Develop leadership skills while maintaining human connection in an AI environment.

Course Outline:

Module 1 – Embrace AI:

- Define AI
- Explore the impact on the employees we lead
- Reflect on ethical considerations

Module 2 – Elevate Skills:

- Understand how the role of the leader is evolving
- Know the benefits of AI for people leaders
- Level up skills of critical thinking, coaching, and change leadership

Module 3 – Create Connection:

- Harness the power of human connection
- Understand how to keep connection alive
- Know importance of empathy
- Incorporate change communication skills

Assessment Strategy:

Pre and post Leadership AI Readiness Assessment

Course Language:

English

Prerequisites:

Leadership AI Readiness Assessment
